TITLE : ORGANIC ELECTROLUMINESCENCE ELEMENT MATERIAL AND ORGANIC ELECTROLUMINESCENCE ELEMENT USING THE SAME

ABSTRACT : PROBLEM TO BE SOLVED: To provide an organic electroluminescence element material and an organic electroluminescence element of high brightness, high luminous efficiency, little luminescence deterioration, and high reliability.

SOLUTION: An organic electroluminescence element material made up and represented by an expression and an organic electroluminescence element using this are obtained. In the expression, R₁ to R₁₄ designate a hydrogen atom, a halogen atom, a cyano radical, a nitro radical, an alkyl radical, an aryl radical, an alkoxy radical, an aryloxy radical, an alkylthio radical, an arylthio radical, a cycloalkyl radical, an allyl radical, a heterocyclic radical, an amino radical, an alkylamino radical, and an arylamino radical, respectively. Further, a new ring may be formed by bonding neighboring radicals among R₁ to R₁₄ to each other.
